Guidelines

Home > Guidelines

Within the GalNet, a **Guidelines Working Group** composed of 19 international experts from 9 countries developed guidelines for diagnosis, treatment and follow-up for classic galactosemia, coordinated by [Dr. Annet M. Bosch](#).

The Guidelines were published in 2017, and can be found [here](#).

The summary of the guidelines has been **translated** into different languages using lay terms to make it accessible to families and patients. Below you will find the translations to Bulgarian, Dutch, Estonian, French, German, Italian, Portuguese and Spanish. [Prof. Dr. Laurie Bernstein](#) is leading this dissemination strategy.
